

## Update on TDWR SPG Product Distribution

26 April 2009

Sites that are candidates for central collection activation next week are: None. Only one site remains to be activated (Las Vegas). They are scheduled to get AWIPS OB9 on May 5th, so they will become a candidate for the week of May 12th.

Sites activated this past week were:

- 1) TMDW - Chicago Midway
- 2) TMSY - New Orleans
- 3) TORD - Chicago O'Hare

The ROC is hosting a web page for TDWR SPG general information and central product collection at <http://www.roc.noaa.gov/spg/>

TDWR SPG products can be viewed via RIDGE Version 2 beta test  
<http://radar.srh.noaa.gov/>

Products are archived at NCDC, can be retrieved from <http://www.ncdc.noaa.gov/nexradinv/choosesite.jsp>, and are displayable using the Weather and Climate Toolkit at <http://www.ncdc.noaa.gov/oa/wct/install.php>, which also supports display from the RPCADS by using the Custom link feature (e.g., paste link <http://weather.noaa.gov/pub/SL.us008001/DF.of/DC.radar/DS.186zl/SI.tdca/> and navigate to other radars and products by typing updates to sites (SI.xxx) and products (DS.xxxxx)).

We likely will not send further updates on this activation project.

Questions can be addressed to: [Michael.Istok@noaa.gov](mailto:Michael.Istok@noaa.gov) or [Tim.D.Crum@noaa.gov](mailto:Tim.D.Crum@noaa.gov).
