

## Engineering Technical Order

Date: February 03, 2012

### **Installation of Bottom Cover on Klystron Air Flow Sensor Circuit Card Assembly, Modification Note 146**

The purpose of this modification is to install a bottom cover on the 3S10 Klystron Air Flow Sensor Assembly. +28 VDC exists on the feed-through tabs at the bottom of the CCA. Installation of the bottom cover will eliminate the possibility of contacting these tabs with the 3W104 cable and damaging the CCA.
