

**Points of Contact at
WSR-88D Level II Data Collection and Distribution Network Top
Tier Sites As of: 12 Dec 2024**

The National Weather Service uses Internet2 to send Level II data to three “top tier” nodes. The node at Unidata is used to meet the needs of .edu organizations/Unidata member universities.

Other users, particularly the private sector, can obtain Level II data from the other two top tier sites on a cost-recovery basis. Below are the points of contact, no preference is implied, for obtaining information on Level II data services from a top-tier site:

Education and Research Consortium of the Western Carolinas

<https://ercbroadband.com/nexrad/>
tech@ercbroadband.org

**The University of Oklahoma
Integrated Robust Assured Data Services (IRADS)**
